

Please do not hamper XM Satellite Radio's instant traffic and weather programs. It is so useful to those of us who spend long hours on the highway and need up-to-date traffic and weather information. XM Radio is the best thing to come along for us long-distance drivers...we pick up local radio stations, but in areas where none are available, we now have satellite radio, plus weather and traffic info. Weather info is so crucial to mountain travel. Thank you.
